

KF-8 INSECTICIDE **MICRO EMULSION CONCENTRATE**

ONE HOUR RE-ENTRY*

DESCRIPTION

Kingfisher KF-8 INSECTICIDE MICROEMULSION CONCENTRATE is a third generation, aqueous, timber treatment in a concentrated form, which, when diluted, gives a virtually odourless, long lasting, deeply penetrating micro suspension. The product is an aqueous blend of non-ionic surfactants and active ingredients.

Kingfisher KF-8 has been reformulated to remove all hydrocarbon solvents and to make the dilution universal across our range. The One hour re-entry time is still a major benefit, but is now coupled with organic solvent free technology.

APPLICATION

Diluted **Kingfisher KF-8 INSECTICIDE MICROEMULSION** can be applied using a brush or low pressure spray and will deliver a highly penetrative micro emulsion insecticide.

This will eradicate or prevent any wood boring insect infestation.
(Note: - Death-Watch or House Longhorn beetles will need a penetrative paste treatment).

DIPPING

If appropriate, wood may be immersed in the diluted product for a minimum of 3 minutes.

MIX INSTRUCTION

Pour approximately 10 litres of water in a clean container and add 2 litres of **Kingfisher KF-8 INSECTICIDE MICROEMULSION CONCENTRATE**. Top up the container to 25 litres with water
2 litres of Kingfisher KF-8 will make 25 litres of ready to use solution

COVERAGE

1 litre covers 3 to 4 sq. metres (depending on porosity)

PACKAGING

Kingfisher KF-8 INSECTICIDE MICROEMULSION CONCENTRATE is supplied in 4 litre graduated plastic containers. (Produces 50 litres of final product)

HEALTH & SAFETY

Statutory conditions relating to use of Kingfisher KF-8 Insecticide Microemulsion.

- **FOR USE ONLY AS A WOOD PRESERVATIVE.**
- The Control of Substances Hazardous to Health Regulations (COSHH) apply to the use of this product at work.
- **FOR USE BY PROFESSIONAL OPERATORS.**
- Engineering control of operator exposure must be used where reasonably practicable in addition to the following items of Personal Protective Equipment (PPE); Protective overalls, synthetic rubber/PVC gloves and eye protection.
- Take off immediately any contaminated clothing.
- Avoid excessive contamination of overalls and launder regularly.
- **DO NOT** breathe spray mist, otherwise wear respiratory protective equipment and eye protection. (See HSE Guidance Booklet HS(G) 53. "Respiratory Protective Equipment – A practical guide for users).
- Engineering controls may replace PPE if a COSHH assessment shows that they provide an equal or higher standard of protection.
- When using **DO NOT EAT, DRINK or SMOKE.**
- Harmful to aquatic organisms, may cause long term adverse effects in the aquatic environment.
- **REMOVE or COVER** fish tanks and bowls before application.
- **DO NOT** contaminate watercourses or ground with chemicals or used containers.
- **REMOVE or COVER** foodstuffs, food preparing equipment and eating utensils before application.
- **DO NOT** apply to surfaces on which food or feed is stored, prepared, or eaten.
- **DO NOT** use on **beehives or beekeeping equipment.**
- **COVER** water storage tanks **BEFORE** application.
- This material and its container must be disposed of as per instructed in the MSDS.
- Bats are protected under The Wildlife Countryside Act 1981. Therefore **BEFORE TREATING** any structure used by bats please consult with English Nature, Scottish National Heritage or the Countryside Council for Wales.

***EXCLUDE ALL UNPROTECTED PERSONS AND ANIMALS DURING TREATMENT AND FOR AT LEAST ONE HOUR AFTER TREATMENT IS COMPLETED. ENSURE THERE IS A PHYSICAL BARRIER TO PREVENT CONTACT BY UNPROTECTED PERSONS OR ANIMALS UNTIL THE TREATED AREAS ARE VISIBLY DRY**

This product is approved under the Control of Pesticides Regulations (1986) for use as directed, HSE No. 6827.

READ ALL PRECAUTIONS BEFORE USE
